About Me

I am a dedicated and ambitious computer engineering student with a passion for technology and a commitment to continuous learning. As an all-rounder, I possess a diverse skill set that enables me to excel across various disciplines within the field of engineering. Proficient in programming languages such as Python and Java, I have a solid foundation in software engineering principles and have honed my skills in database management, web development, and operating systems. Additionally, my hands-on experience extends to networking fundamentals, where I have successfully configured and troubleshooted network devices. Beyond technical expertise, I am equipped with strong problem-solving abilities and critical thinking skills, complemented by excellent communication capabilities. I thrive in collaborative environments, effectively conveying complex technical concepts and contributing meaningfully to team projects.

Education

Shree Secondary School Dudhiawa, Rautahat, Nepal

2019 - 2023

Computer Engineering

I have completed a comprehensive four-year computer engineering technical education program from class IX to class XII, accredited by the Government of Nepal. Acquired a solid foundation in diverse aspects of computer engineering, showcasing dedication and commitment to academic excellence.

Training/Certification

Global Institute of Computer and Language Training Pvt.Ltd

Duration: 5 months (600 hours)
Diploma in Computer Application

Achievement

- License Holder (Motorcycle + Car)
